

Hai Trung Do

Third Year Computer Science Student at the University of Adelaide

[DoTRung1023](#) | [Hai Trung Do](#) | nolimitrung@gmail.com | dotrung.vercel.app

Education

The University of Adelaide

Bachelor of Computer Science

Feb 2024 – Dec 2026 (Expected)

GPA: 6.9/7.0 - WAM: 92.50%

Experience

University of Adelaide

Summer Research Intern | Supervised by [Dr Feras Dayoub](#)

Dec 2025 – Feb 2026

Adelaide, SA

- **Tech Stack:** Python, ROS2, Gazebo simulator, TurtleBot3 robots, ROSBridge, WebSocket, FastAPI, MongoDB, Ubuntu
- **System Development:** Built a reusable ROS2 simulation test-bed and multi-robot coordination system for human-robot collaborative search-and-deliver tasks
- **Task Allocation:** Designed a greedy task allocator benchmarking robot-only, human-only, and mixed-team configurations via a ROSBridge web interface

Projects

eFootball Ban & Pick – Competitive Draft Web App

Full-Stack Developer | Personal Project

April 2026 – May 2026 (Expected)

Adelaide, SA

- **Tech Stack:** Node.js/Express.js, MySQL, Vanilla JS/HTML/CSS, Cheerio, bcryptjs, WebSockets
- **Role:** Built a full-stack eFootball draft app with a 41k-player scraped catalog, real-time ban/pick rooms, game plan builder, and user authentication

Study1Only - Music-Enhanced Learning Platform

Full-Stack Developer | Group Project

March 2025 – June 2025

Adelaide, SA

- **Tech Stack:** Vue.js, Node.js/Express.js, MySQL, Spotify Web API, Pexels API, HTML, CSS, JavaScript
- **Role:** Developed Spotify integration with OAuth 2.0 authentication, dynamic background customization system, cookie management, and integrated team codebase with Git version control

Boston Crime Data Analysis

Data Analyst | Individual Project

May 2025 – June 2025

Adelaide, SA

- **Tech Stack:** Python, Jupyter notebook
- **Key Findings:** Quantified district-level crime disparities (up to 1,356% geographic variation) and rush-hour spikes (+40% incident concentration), informing targeted patrol scheduling and resource allocation

Animal Chess - Strategic Board Game

C++ Developer | Group Project

Sep 2024 – Oct 2024

Adelaide, SA

- **Tech Stack:** C++ with SFML graphics framework
- **Role:** Implemented OOP design with abstract base classes and inheritance, rock-paper-scissors combat mechanics, save/load system, RAII memory management, and unit testing suite

Mandarin Square Capturing - Traditional Board Game

MATLAB Developer | Individual Project

March 2024 – April 2024

Adelaide, SA

- **Tech Stack:** MATLAB with modular design across 25+ functions
- **Role:** Sole developer implementing graphical interface, game logic validation, and two-player modes

Extracurricular

Adelaide University Competitive Programming Club (ACPC) | AUCPL Division A

Member & Competitor

Mar 2026 – Oct 2026

Adelaide, SA

- Active member of ACPC and competitor in the Adelaide University Competitive Programming League (AUCPL) Division A
- Competed in monthly contests (one event per month) with cumulative results tallied across the season leaderboard

RAVI Study Program (RSP) Adelaide

Intermediate Student

Nov 2025 – Feb 2026

Adelaide, SA

- Strengthened data structures and algorithms through self-directed study (technical reading, coding practice, LeetCode) and mock interview sessions to improve problem-solving and technical communication
- Built a supportive peer network (including students interning/working at major tech companies), gaining practical insights and motivation through shared learning

Technical Skills

Languages: Python, C, C++, JavaScript, HTML/CSS, R, MATLAB, LaTeX

Frameworks: Express.js with Node.js, React, Vue.js, Bootstrap, FastAPI, RESTful APIs, WebSocket, MySQL, MongoDB

Developer Tools: Git, Docker, Google Colab, Google Cloud Platform, Jupyter Notebook, Linux, Ubuntu, AWS
